Soft PVC photo frame

Promotional soft pvc customized for very nice full color, relief and 3D photo frame

Photo frame comes in all kind of shapes and sizes. The two most conventional types are photo frame keychain and larger photo frame stand.

Photo frame keychain are usually made back and front from soft pvc cloisonne, the picture is inserted from the top in between the front side & back side.

We have plastic injection tooling (ABS) for different sizes with stand, magnet and hanger function.

For all other custom shape and size photo frame stand & holder, we use 600g and 1,200g cardboard frame

Logo process

2D PVC Cloisonne

2D, also called 2D relief or multilevel, is the most common and basic quality of soft pvc. Tooling more simple and cheaper, it can be open by regular CNC.

You can have as many different level as you like, but each level surface is flat, like staircase. It is recommended to always make lettering and small details in relief, a level up from the base or background color.

3D PVC Cloisonne

Tooling are more expensive and sophisticated, they can only be open with a numerical CNC machine, similar to plastic injection tooling.

In the case of 3D you don't have actual different level, but progressive level, without flat surface, but convex and oblong surface. 3D is more suitable when the design consist of character & cartoon like personage or animal.
