## Soft PVC wristband

**Promotional customized soft pvc makes for very nice full color, relief and 3D wristband.**

Comparable with silicon wristband, soft pvc wristband are much more colorfull and allow for the manufacturing of relief and 3D design which silicon cannot make. This type of wristband usually comes with plastic button or metal button.

Additionally to wristband, soft pvc allows the manufacturing of any kind of band and strap, like

- dog & cat collar and leash
- Belt for trouser and skirt.

### Logo process

#### 2D PVC Cloisonne

2D, also called 2D relief or multilevel, is the most common and basic quality of soft pvc. Tooling more simple and cheaper, it can be open by regular CNC.

You can have as many different level as you like, but each level surface is flat, like staircase. It is recommended to always make lettering and small details in relief, a level up from the base or background color.

#### 3D PVC Cloisonne

Tooling are more expensive and sophisticated, they can only be open with a numerical CNC machine, similar to plastic injection tooling.

In the case of 3D you don't have actual different level, but progressive level, without flat surface, but convex and oblong surface. 3D is more suitable when the design consist of character & cartoon like personage or animal.
