Soft PVC luggage tag

Soft they won't scratch your luggage and you can insert a name card directly.

Soft pvc makes for great relief and multi-colors luggage tag, waterproof and foldable, they are very durable and won't scratch your luggage.

Coming with an easy to write leaflet you can also insert your name card directly inside. Luggage tag comes in all type of size and shape, but the most common size, fitting standard name card size, is 105 x 64 mm.

For that size we have a standard plastic injection (ABS) hard frame, and (PS) soft frame strap.

Logo process

2D PVC Cloisonne

2D, also called 2D relief or multilevel, is the most common and basic quality of soft pvc. Tooling more simple and cheaper, it can be open by regular CNC.

You can have as many different level as you like, but each level surface is flat, like staircase. It is recommended to always make lettering and small details in relief, a level up from the base or background color.

3D PVC Cloisonne

Tooling are more expensive and sophisticated, they can only be open with a numerical CNC machine, similar to plastic injection tooling.

In the case of 3D you don't have actual different level, but progressive level, without flat surface, but convex and oblong surface. 3D is more suitable when the design consist of character & cartoon like personage or animal.
